

## Assembly instructions 9110.120

**Attention!** The lamps for this suspension must be only LED because of the acrylic component.

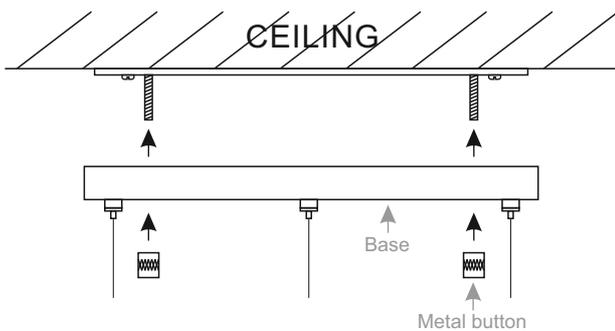

**1** - Insert the steel cables into the adjusters. Insert the cable clamps into the steel cables and smash them with pliers;

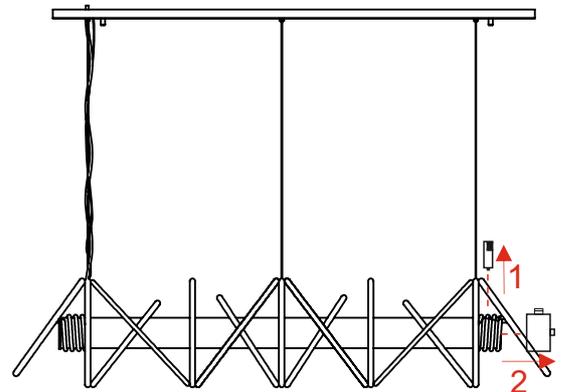

**2** - Fix the fixing bar to the ceiling.  
(Screws not included. Please use screws suitable for the material of the roof).

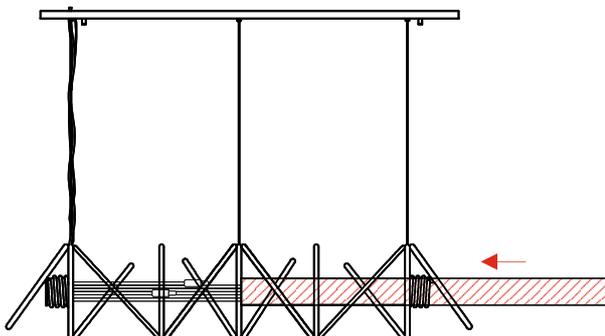

**3** - Connect the electrical wires; Fix the base with the metal buttons and adjust the steel cables with the desired length;

**4** - Unscrew the metal piece (1) and take the metal box (2) out;

**5** - Place the acrylic carefully;

**6** - Put the metal box (ø60 with 40mm) in the same place as the beginning. Conclude with the metal piece .
